

This week we are looking at fractions of $\frac{1}{2}$ and $\frac{1}{4}$. We have been looking at finding $\frac{1}{2}$ and $\frac{1}{4}$ of a shape as well as finding that of a number. With your child this week can you please find various shapes around your house and ask them if they can find 'two equal sides' or 'two unequal sides'. Looking at numbers we have introduced the idea of sharing food between two animals, a spider and a turtle. Find below an example of finding half and a quarter of a given number.
